Silver City is being designed for an energy storage capacity of 200MW/1,600MWh, equating to 8 hours of duration, with 250MWh set aside to provide backup power to the town of Broken Hill having been chosen by regional transmission system operator (TSO) Transgrid to do so last year.

Luxembourg: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
