A whole house generator is the most powerful type of home generator available. It's wired to your electric panel and turns on automatically when you lose power, so your entire ...

Whole house automatic generator

You need an automatic transfer switch to run a standby generator. A manual transfer switch that you use for your portable generator will not work, and that's probably what the person had in mind. During a blackout, an automatic transfer switch will automatically command your generator to start and backup your house, as if nothing happened.
